THE WIDTH OF THE HOLE IS ABOUT ONE METRE,
AT MOST ONLY ONE PERSON CAN GO THROUGH IT AT ANY TIME,
SO IT'S IMPOSSIBLE TO GO THROUGH IT WHILE CARRYING THE ONE AWAITING TO BE RESCUED,
THERE'S ONLY ONE COMPACT OXYGEN TANK THAT THE ONE AWAITING TO BE RESCUED IS USING,
AND THERE'S ONLY ONE OF THIS OXYGEN TANK THAT THE BOTH OF US WILL USE.
WE'LL HAVE TO BUDDY BREATHE WHILE BRINGING THE ONE AWAITING TO BE RESCUED TO AND OUT THROUGH THE HOLE!
EH...!?
UNDERSTAND?
ドォォォ!!

YOU CARRY THE OXYGEN TANK.
OK.
I'LL CARRY THE ONE AWAITING TO BE RESCUED.
BUDDY BREATHING – TWO PEOPLE SHARING ONE OXYGEN TANK ACKNOWLEDGING EACH OTHER'S BREATHING TEMPO AND ALTERNATING THE REGULATOR
I'VE LEARNED IT DURING DIVING TRAINING,
WHO WOULD'VE THOUGHT I'D USE IT UNDER SUCH HARSH ENVIRONMENT
I WILL PUSH HIM OUT FROM INSIDE,
I WILL GO THROUGH THE HOLE ONCE YOU HAVE BROUGHT HIM OUT
AFTER WE DIVE TO THE FRONT OF THE HOLE, YOU GO THROUGH TO THE OUTSIDE AND STANDBY,
THE THREE OF US WILL GET OUT OF HERE TOGETHER!

THAT'S RIGHT!
IT WILL DEFINITELY BE FINE WITH A CAPTAIN FROM-TOKKYU!!
THE THREE OF US...
WILL GET OUT OF HERE ALIVE!!

CYANOSIS!!
I HAVE TO GIVE EMERGENCY TREATMENT QUICKLY!

IT, S UNAVOID, ABLE...
BUT THE AIR IN THIS ROOM IS FILLED WITH VOLATILE GASO- LINE...
THE REMAIN- ING OXYGEN IN HIS OXYGEN TANK ISN'T MUCH, I CAN'T USE IT TO DO CARDIOPUL- MONARY RE- SUSCITATION,
ONCE I BREATHE IN, THE AIR GOES INTO MY BODY,
THE AIR WILL MORE, OR LESS BE PU- RIFIED!
COME ON, START- BREATH- ING AGAIN!!

NOT YET!?
